Energy harvesters power wearables
Researchers at North Carolina State University are using nanotechnology to create energy harvesting and storage devices for ultra-low power sensors. The federally-funded research aims to create battery-free, body-powered wearable health monitors.

TI DLP[®] automotive chipset for head-up display enables widest field-of-view in the industry.

Wall Paper

The wall paper ad format is ideal for branding campaigns as it dominates the entire screen and stays in the background while visitors read content and move from page to page. The ad also provides ample space for advertising messages and call for action. Any click anywhere in the background leads the user to the advertiser site.
